

- 1** Slide the back cover of the router open. Make a note of the Wi-Fi password.

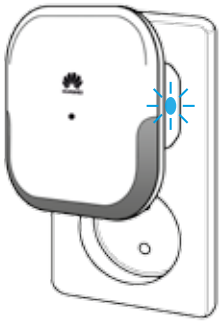

**Rete Wi-Fi (SSID):
Huawei E8238-630F
Password Wi-Fi:
123A4B5C**

- 2** Replace the back cover and plug the router into the wall socket.

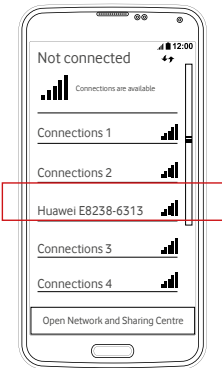

- 3** A blue light will come on indicating that your router has power.

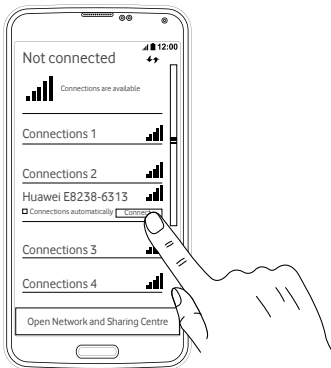

- 4** Switch on the Wi-Fi settings on the devices you want to activate (cellphones, tablets, laptops or computers).

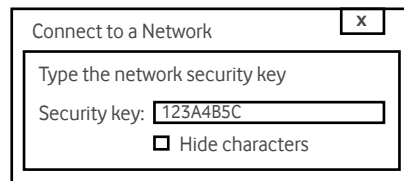

- 5** Go to the Wi-Fi settings on the cellphones, tablets, laptops or computers you are activating and select the Huawei device.

- 6** Connect to your Huawei device.

- 7** Type in the Wi-Fi password you made a note of earlier and click on "OK."

Once connected, a blue light will flash. Open the Internet browser and type in www.vodacom.co.za

- 8** You will now see the registration page which means you are ready to power up and access a world of connectivity.

Congratulations and welcome to Vodacom At Home
